AND POLYPEPTIDES FOR APPLICATION TO TRANSMEMBRANE
DRUG DELIVERY SYSTEM

RESPONSE

Mail Stop Sequence
Commissioner for Patents
PO Box 1450
Alexandria, VA 22313-1450

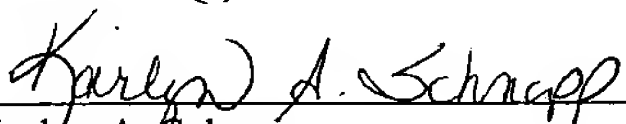

Dear Sir:

Attached hereto, is a resubmission of the sequence listings in the above patent application, which are in compliance with 37 CFR 1.821-1.825. These sequence listings are to replace those submitted to the Patent Office on November 4, 2002 in response to an Office Action requesting resubmission due to improper format. Upon further review of the file, it was determined that the listings submitted on November 4, 2002 only included those sequences that were objected to, and did not include the two that were accepted as being in appropriate form. The sequence listing herein contains each of the sequences present in the application in the appropriate format. A computer-readable diskette, which contains the sequence listing in ASCII format is also enclosed, along with a written sequence listing which is identical to the electronic sequence listing. These sequence listings correspond to the sequence listings contained in the above-cited application and as such, no new matter is introduced as a result of these corrections.

Serial No. 09/780,438

Respectfully submitted,

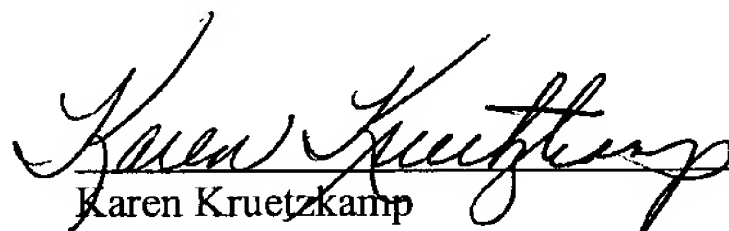

XIAOYANG QI, PH.D.
